 TradingView

The **MATI Trader System** has just had a
Major Upgrade and Facelift...

REMEMBER:

The MATI Trader System is a
Powerful low risk, breakout trading
strategy proven to deliver consistent
returns in any high-volume traded market.

AND?

We have made the system even more **effective** to **spot WINNERS** and to **avoid the LOWER probability trades.**

AND?

We have specially customised, designed and programmed the **MATI Trader System** to help spot High probability trades.

As of February 2024

INTRODUCING

THE NEW LOOK

MATI TRADER SYSTEM: NEW LOOK & FEEL

»

MATI 20-200 SMA Indicator

WHAT IS IT?

The MATI 20-200 SMA Indicator is:

a carefully designed tool to help you identify when the market is **expected to move up or down** and when it is in a **bull market (up trend) or a bear market (down trend)**.

MATI 20-200 SMA Indicator

GREEN AND RED BACKGROUND

Green Background

- When the market's **PRICE** is **ABOVE** the **20 SMA** and the price is **ABOVE** the **200 SMA** (Black line).
(It is in an uptrend – **BULL MARKET**)

Red Background

- When the market's **PRICE** is **BELOW** the **20 SMA** and is **BELOW** the **200 SMA** (Black line).
(It is in a downtrend – **BEAR MARKET**)

MATI TRADER

HIGH VS

MEDIUM

PROBABILITY TRADES

HIGH PROBABILITY VS MEDIUM PROBABILITY?

The old adage of the Trend is Your friend – has never been truer. Especially with the **MATI Trader System**.

THE PROBLEM!

*How do we know when a trade is more likely to
work out in the long run?*

We need a **system to adapt** into the markets to **SPOT
better trades** going forward...

WE FOUND!

Medium Probability trades yield **LOWER** returns with:

- More LOSING trades
- More unnecessary trading costs
- More unnecessary holding fees over night.
- Break even or small return by the end of the year.

WE FOUND!

High Probability trades yield **HIGHER** returns with:

- Less LOSING trades
- Less unnecessary trading costs
- Less unnecessary holding fees over night.
- Higher Return from these type of trades at the end of the year.

The other indicators we used in the past (7MA and RSI) and different Background colours with the system was for ONLY Peripheral vision.

Which means one thing.

THEY'RE USELESS

GONE!

We removed the **RSI** from the trading analyses as well as the **7MA** (As the price is tied around this MA anyway).

GONE!

We also removed the background rules for when the price is **ONLY** above the 200MA or below the 200MA.

You'll see why...

THE SOLUTION!

We need to focus on **HIGH PROBABILITY TRADES** in the future.

According to the stats this will improve our odds by the following:

WE WANT **HIGH PROBABILITY TRADES!**

This means:

- ✓ **Less trades** per year – Less costs and carry fees.
- ✓ Around **68% Win rate** trading system.
- ✓ Better **clarity and focus** on what to trade.
- ✓ Know when **NOT to trade** (Because we avoid other trades)

HIGH PROBABILITY VS MEDIUM PROBABILITY TRADES

With the **NEW MATI Trader System Indicator**, we'll be able to
spot HIGH PROBABILITY TRADES better and
avoid MEDIUM PROBABILITY TRADES.

HIGH PROBABILITY TRADE

When we **BUY (GO LONG) (GREEN BACKGROUND)**

The price needs to be **ABOVE** the 20MA.

The price needs to be **ABOVE** the 200MA.

When we **SELL (GO SHORT) (RED BACKGROUND)**

The price needs to be **BELOW** the 20MA.

The price needs to be **BELOW** the 200MA.

With High Probability trades we will be happy to risk 2% for longer term trades or 0.5% for Day Trading trades.

MEDIUM PROBABILITY TRADE

BUY (GO LONG) (White background)

The price is ABOVE the 20MA.

The price is BELOW the 200MA.

Notice the Background
is WHITE

SELL (GO SHORT) (White background)

The price is BELOW the 20MA.

The price is ABOVE the 200MA.

Notice the Background
is WHITE

We will look to avoid Medium probability trades. But sometimes, we might take them if the markets really look good for upside or downside.

But will NEVER risk more than 1.5% with Medium Probability trades.

**LET'S SEE A HIGH PROBABILITY
VS MEDIUM PROBABILITY TRADE**

In Action...

20 SMA

STOP LOSS

ENTRY

TAKE PROFIT

200 SMA

MEDIUM PROBABILITY TRADE

Action to Sell (Go short)

Price is below 20 SMA

Short term trend is down.

Price > 200SMA

Medium term trend is up.

WE AVOID MEDIUM PROBABILITY TRADES

HIGH PROBABILITY TRADE

Action to Buy (Go long)

Price is above 20 SMA

Short term trend is up.

Price > 200SMA

Medium term trend is up.

WE TAKE THESE TRADES

200 SMA

First we'll wait for the pattern to form.

Then we'll look to see if it is a **HIGH**
probability or a **MEDIUM probability** trade.

That way we'll know when and how to act!

Let's get the MATI Trader System on

Your charts!

HOW TO GET THE INDICATOR - FREE STEP-BY-STEP-GUIDE:

Step #1:

Download the MATI Trader Indicator file:

Indicator:

// The background is LIGHT red when the closing price is below both the
// The background is white when the price is inbetween the MAs

//@version=5
indicator("MATI 20/200", overlay=true)

// Create variables for the moving averages
sma20 = ta.sma(close, 20)
sma200 = ta.sma(close, 200)

// Plot the moving averages on the chart w
plot(sma20, title="20 SMA", color=color.rg
plot(sma200, title="200 SMA", color=color.

// BUY and SELL logic based on SMA crossov
buy = ta.crossover(sma20, sma200) and clos
sell = ta.crossunder(sma20, sma200) and cl

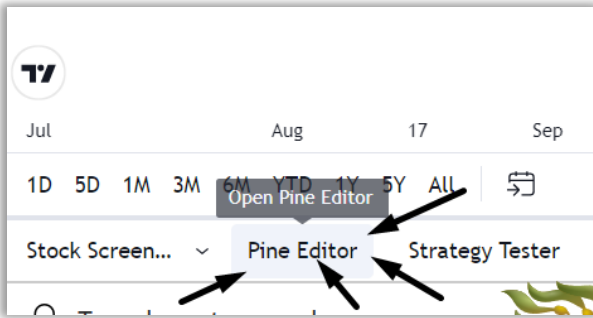

// Determine background color based on pri
greenBackground = close > sma20 and close
redBackground = close < sma20 and close <
```

STEP-BY-STEP-GUIDE:

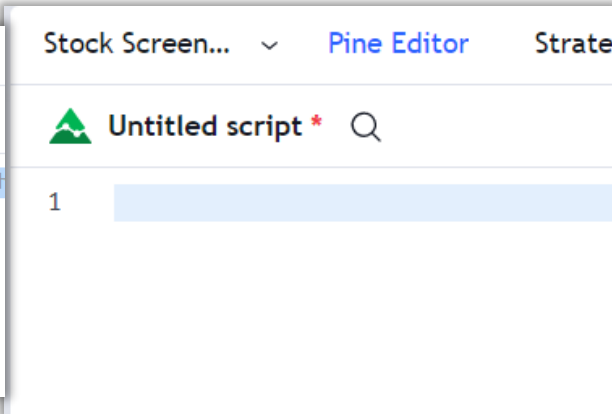

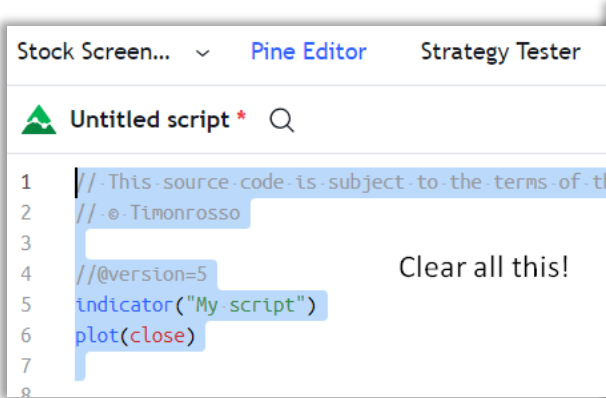

Step #6:

Paste the MATI Trader Indicator code in:

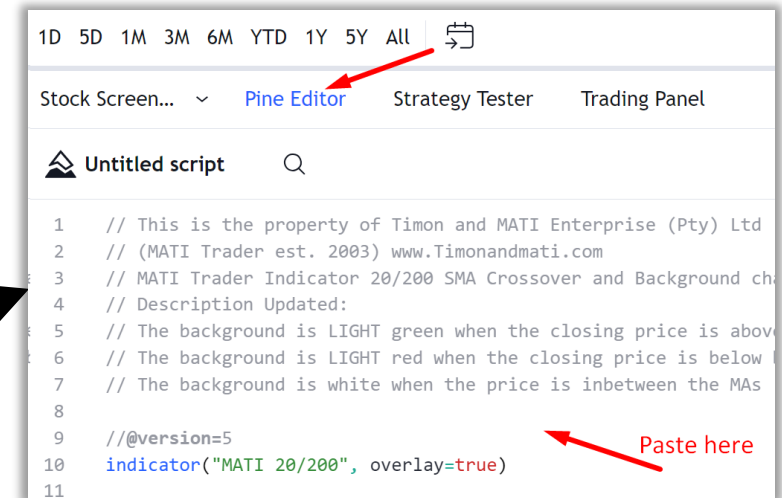

2. Click 'Pine Editor' at the bottom below the Date of the chart.

3. In the window Clear (delete) all the copy (default code) you see.

4. Copy & Paste the new code into the window.

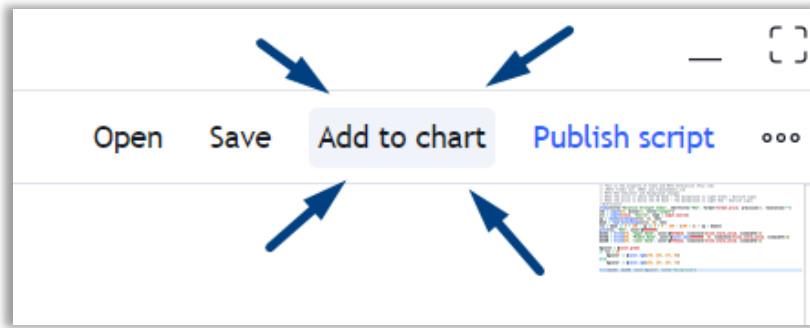

STEP-BY-STEP-GUIDE:

Step #7:

Add to Chart and Save the indicator:

1. Click “Add to chart” on the right which will plot the indicator on your chart.

Click ‘Save’ and Rename it as your wish.

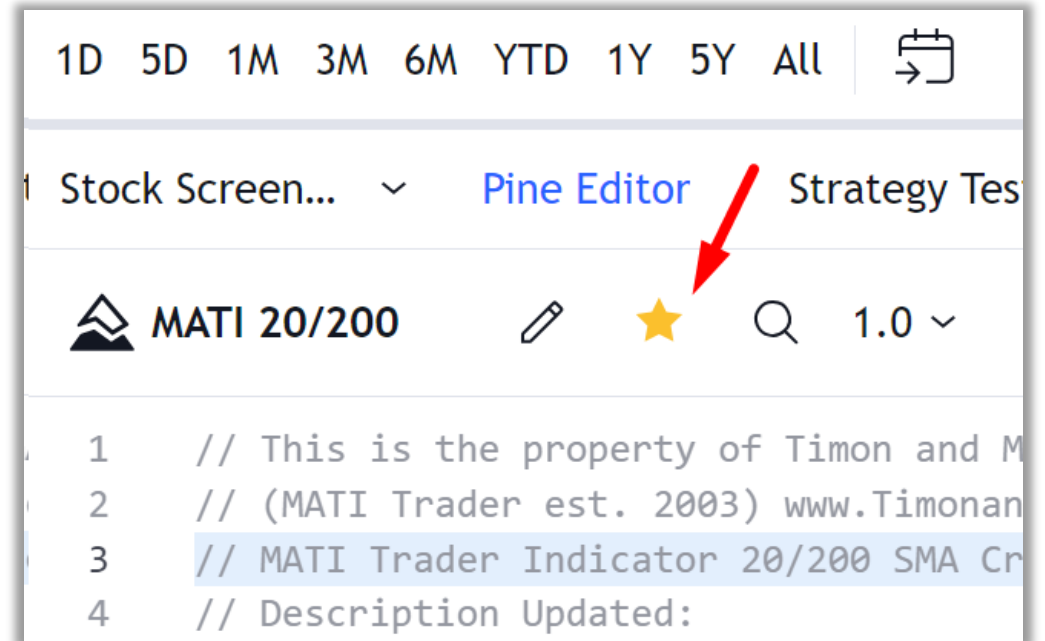

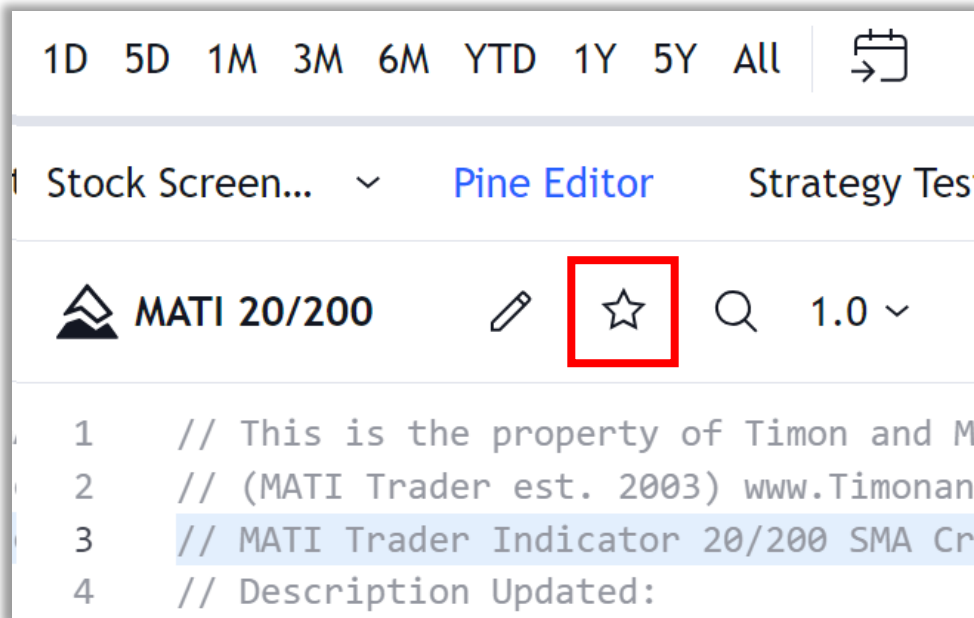

STEP-BY-STEP-GUIDE:

Step #8:

Favourite the indicators

1. Click the Star shape (On the left side) until it turns Yellow to favourite the indicator.

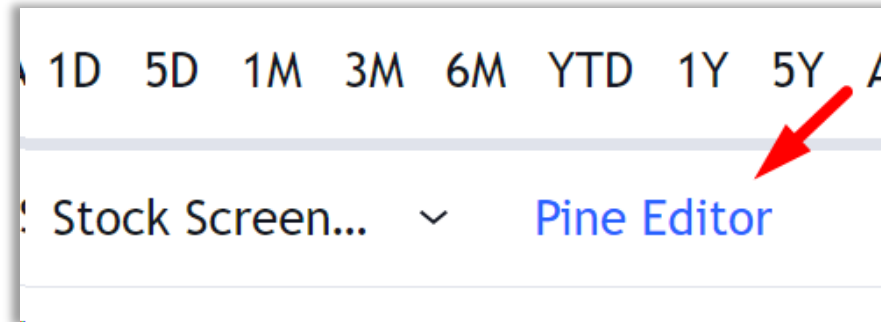

STEP-BY-STEP-GUIDE:

Step #9:

Close Pine Editor

Click Pine Editor to close the Editor window.

STEP-BY-STEP-GUIDE:

Step #10:

Find the MATI Trader Indicator easily

Click 'Indicator' – Favourites – Click on your new MATI Indicator.

The screenshot shows a trading platform interface. At the top, there is a navigation bar with icons for 'Indicators', 'Alert', 'Replay', and other functions. Below this, a candlestick chart is visible with price data: O4859.45 H4882.70 L4850.70 C4877.70 +17.64 (+0.36%). The main section is titled 'Indicators, Metrics & Strategies' and contains a search bar and a list of indicators. The 'Favorites' section is highlighted, and the 'MATI System 20/200' indicator is selected.

The advertisement features a central image of a laptop displaying a trading chart with a red horizontal line and a green vertical line. To the right of the laptop is a smartphone with a crown icon, an eye icon, and two buttons labeled 'BUY' (green) and 'SELL' (red). The background is a dark blue gradient with a faint trading chart. At the bottom, there is a large yellow '2024' with 'Big SALE' and 'UP TO 70% OFF' tags, and the text 'NEW YEAR SPECIAL' below it.
